Author index 1975–1984

The following index includes the authors of all papers that have been published in the *IBM Systems Journal* since 1974. Order numbers for reprints of individual papers are included in the main entry for each paper.

Indexes for 1970 through 1974 appeared in Volume 13, Number 4 (1974), and indexes for 1962 through 1969 appeared in Volume 8, Number 4 (1969). Issues and reprints of papers covered by these previously published indexes are not available from IBM.

ACKER, R. D., and P. H. Seaman, Modeling distributed processing across multiple CICS/VS sites, **21,** 4, 471 (1982); *G321-5177.*

Subject index 1975–1984

The following index includes the subjects of all papers that have been published in the *IBM Systems Journal* since 1974. Order numbers for reprints of individual papers are included in the main entry for each paper.

Indexes for 1970 through 1974 appeared in Volume 13, Number 4 (1974), and indexes for 1962 through 1969 appeared in Volume 8, Number 4 (1969). Issues and reprints of papers covered by these previously published indexes are not available from IBM.

APPLICATION DEVELOPMENT

A program generator
Hagamen, **14,** 2, 102

User controlled DB/DC system
Heyne, **16,** 4, 344

The management of software engineering
I Principles of software engineering
Mills, **19,** 4, 414
II Software engineering program
O'Neill, **19,** 4, 421
III Software design practices
Linger, **19,** 4, 432
IV Software development practices
Dyer, **19,** 4, 451
V Software engineering management practices
Quinnan, **19,** 4, 466

Application development system: Patient Care System
Mishelevich, **19,** 4, 478

The Modular Application Customizing System
Gordon, **19,** 4, 521

System Productivity Facility
Joslin, **20,** 4, 388

Strategies for information requirements determination
Davis, **21,** 1, 4

Business Systems Planning and Business Information Control Study: A comparison
Zachman, **21,** 1, 31

Towards an integrated development environment
Newman, **21,** 1, 81

How data flow can improve application development
Stevens, **21,** 2, 162

Technique for assessing external design of software
Pearsall, **21,** 2, 211

A perspective on communications and computing
Scherr, **22,** 1/2, 5

NIL: A high-level language for distributed systems programming
Parr, **22,** 1/2, 111

Abstract design and program translator: New tools for software design
Archibald, **22,** 3, 170

The system architecture of EAS-E: An integrated programming and data design language
Pazel, **22,** 3, 188

A simple architecture for consistent application program design
Rogers, **22,** 3, 199

The Projected Automated Librarian
Prager, **22,** 3, 214

Automatic generation of random self-checking test cases
Bird, **22,** 3, 229

Full-screen testing of interactive applications
Maurer, **22,** 3, 246

Software reliability analysis
Misra, **22,** 3, 262

Design and use of a program execution analyzer
Power, **22,** 3, 271

Architecture prototyping in the software engineering environment
Beregi, **23,** 1, 4

Factors affecting programmer productivity during application development
Thadhani, **23,** 1, 19

A comparative study of system response time on program developer productivity
Lambert, **23,** 1, 36

An application analyzer
Ambrosetti, **23,** 4, 336

APPLICATIONS

User-oriented data-base retrieval system
Jones, **16,** 1, 4

Input-output econometric model
Sarma, **16,** 4, 398

Solving the installation scheduling problem
Chen, **17,** 1, 82

Experiments in computer-aided graphic expression
Musgrave, **17,** 3, 241

Mass storage archiving
Gravina, **17,** 4, 344

Software systems for physical planning
Smedley, **17,** 4, 359

Computer-assisted office work
Gruhn, **18,** 3, 432

Automatic programming for energy management
Shah, **18,** 3, 457

Page makeup of text with graphics
Shepherd, **19,** 3, 345

User-definable software applied to a real-time ambient air quality monitoring system
Halpern, **20,** 1, 86

JANUS: An interactive document formatter based on declarative tags
Chamberlin, **21,** 3, 250

The EPISTLE text-critiquing system
Heidorn, **21,** 3, 305

OPAS: An office procedure automation system
Lum, **21,** 3, 327

The design rationale of the System/38 user interface
Botterill, **21,** 4, 384

How a computer should talk to people
Dean, **21,** 4, 424

A Satellite Communications Controller
Fennel, **22,** 1/2, 81

Series/1-based videoconferencing system
Anastassiou, **22,** 1/2, 97

Speech filing—An office system for principals
Gould, **23,** 1, 65

CAPACITY PLANNING

Performance model of MVS
Chiu, **17,** 4, 444

Overview of the capacity planning process
Bronner, **19,** 1, 4

Capacity planning methodology
Cooper, **19,** 1, 28

System capacity and performance evaluation
Schiller, **19,** 1, 46

Predicting performance of CICS/VS systems
Seaman, **19,** 1, 68

Role of detailed simulation in capacity planning
Nguyen, **19,** 1, 81

Processor, I/O path, and DASD configuration capacity
Major, **20,** 1, 104

Capacity analysis of the Mass Storage System
Misra, **20,** 3, 346

The VM/370 Resource Limiter
Chess, **20,** 4, 424

Analytic queuing model for CICS capacity planning
Deitch, **21,** 4, 454

COMMUNICATION SYSTEMS MANAGEMENT

Enhanced problem determination capability
Ford, **17,** 3, 276

Centralized communications network management
Weingarten, **18,** 4, 184

Sidestream approach for managing communication systems
Leach, **19,** 1, 120

Systems management
Bird, **19,** 1, 140

SNA flow control: Architecture and implementation
George, **21,** 2, 179

The Document Interchange Architecture: A member of a family of architectures in the SNA environment
Schick, **21,** 2, 220

A perspective on communications and computing
Scherr, **22,** 1/2, 5

X.25 and related recommendations in IBM products
Deaton, **22,** 1/2, 11

Teletex—A worldwide link among office systems for electronic document exchange
Moore, **22,** 1/2, 30

A token-ring network for local data communications
Dixon, **22,** 1/2, 47

Reflections on VM/Pass-Through: A facility for interactive networking
Mendelsohn, **22,** 1/2, 63

Communications Network Management enhancements for SNA networks: An overview
Sullivan, **22,** 1/2, 129

An application of network management at a large computing service
Garrigues, **22,** 1/2, 143

Advanced program-to-program communication in SNA
Gray, **22,** 4, 298

SNA Distribution Services
Housel, **22,** 4, 319

Interconnecting SNA networks
Benjamin, **22,** 4, 344

An experimental address space isolation technique for SNA networks
Ryder, **22,** 4, 367

Logical problem determination for SNA networks
Weingarten, **22,** 4, 387

Performance and availability measurement of the IBM Information Network
Bailey, **22,** 4, 404

SNA routing: Past, present, and possible future
Jaffe, **22,** 4, 417

Defining routing tables for SNA networks
Maruyama, **22,** 4, 435

Windows in the sky—Flow control in SNA networks with satellite links
Grover, **22,** 4, 451

TSO Attach: A multipurpose communication channel to IBM Database 2
Hammond, **23,** 2, 151

COMPUTER SYSTEMS

Overview of Supermarket and Retail Store Systems
McEnroe, **14,** 1, 3

Supermarket System performance studies
Metz, **14,** 1, 46

Retail Store System design and performance
Berk, **14,** 1, 64

Reliability, availability, and serviceability for store systems
Hippert, **14,** 1, 81

The IBM 5100 and Research Device Coupler
Cole, **16,** 1, 41

The Human Side of Computers
Branscomb, **20,** 2, 120

A system for the automated office environment
Gardner, **20,** 3, 321

The design rationale of the System/38 user interface
Botterill, **21,** 4, 384

Series/1-based videoconferencing system
Anastassiou, **22,** 1/2, 97

Architecture implications in the design of microprocessors
Matick, **23,** 3, 264

DATA BASES/DATA COMMUNICATIONS

General audit trail requirements
Bjork, **14,** 3, 229

Peterlee Relational Test Vehicle
Todd, **15,** 4, 285

User-oriented data-base retrieval system
Jones, **16,** 1, 4

Information management system IMS/VS
McGee, **16,** 2, 84

High-performance DB/DC system (ACP)
Siwiec, **16,** 2, 169

Data structures and accessing in data base systems
Senko, **16,** 3, 208

CICS/VS and its role in SNA
Eade, **16,** 3, 258

Automated logical data base design
Raver, **16,** 3, 287

Query-by-Example: a data base language
Zloof, **16,** 4, 324

User controlled DB/DC system
Heyne, **16,** 4, 344

Storage and access in relational data bases
Blasgen, **16,** 4, 363

Design of the 8100 DTMS
Waters, **18,** 4, 565

Predicting performance of CICS/VS systems
Seaman, **19,** 1, 68

Data base security
Wood, **19,** 2, 229

System R: An architectural overview
Blasgen, **20,** 1, 41

A primer on relational data base concepts
Sandberg, **20,** 1, 23

Supporting Business Systems Planning studies with the DB/DC Data Dictionary
Sakamoto, **21,** 1, 54

Towards an integrated development environment
Newman, **21,** 1, 81

Enterprise information analysis: Cost-benefit analysis and the data-managed system
Parker, **21,** 1, 108

Garrigues, **22,** 1/2, 143

Advanced program-to-program communication in SNA
Gray, **22,** 4, 298

SNA Distribution Services
Housel, **22,** 4, 319

Interconnecting SNA networks
Benjamin, **22,** 4, 344

An experimental address space isolation technique for SNA networks
Ryder, **22,** 4, 367

Logical problem determination for SNA networks
Weingarten, **22,** 4, 387

Performance and availability measurement of the IBM Information Network
Bailey, **22,** 4, 404

SNA routing: Past, present, and possible future
Jaffe, **22,** 4, 417

Defining routing tables for SNA networks
Maruyama, **22,** 4, 435

Windows in the sky—Flow control in SNA networks with satellite links
Grover, **22,** 4, 451

Speech filing—An office system for principals
Gould, **23,** 1, 65

Performance issues in local-area networks
Bux, **23,** 4, 351

WORD PROCESSING

JANUS: An interactive document formatter based on declarative tags
Chamberlin, **21,** 3, 250

The EPISTLE text-critiquing system
Heidorn, **21,** 3, 305

OPAS: An office procedure automation system
Lum, **21,** 3, 327

A case study of office workstation use
Bullen, **21,** 3, 351

Reprint Order No. G321-5232.

Contents of Volume 23, 1984

Number One

Architecture prototyping in the software engineering environment 4
W. E. Beregi

Factors affecting programmer productivity during application development 19
A. J. Thadhani

A comparative study of system response time on program developer productivity 36
G. N. Lambert

Analysis of free-storage algorithms—revisited 44
G. Bozman, W. Buco, T. P. Daly, and W. H. Tetzlaff

Speech filing—An office system for principals 65
J. D. Gould and S. J. Boies

Playback: A method for evaluating the usability of software and its documentation 82
A. S. Neal and R. M. Simons

Number Two

An overview of three relational data base products 100
S. Kahn

IBM Database 2 overview 112
D. J. Haderle and R. D. Jackson

The Query Management Facility 126
J. J. Sordi

TSO Attach: A multipurpose communication channel to IBM Database 2 151
K. R. Hammond and M. R. Zimowski

IBM Database 2 in an Information Management System environment 165
J. R. Dash and R. N. Ojala

Data recovery in IBM Database 2 178
R. A. Crus

IBM Database 2 performance: Design, implementation, and tuning 189
J. M. Cheng, C. R. Loosley, A. Shibamiya, and P. S. Worthington

Managing IBM Database 2 buffers to maximize performance 211
J. Z. Teng and R. A. Gumaer

Number Three

Ease of use: A system design challenge 224
L. M. Branscomb and J. C. Thomas

Directions in cooperative processing between workstations and hosts 236
B. C. Goldstein, A. R. Heller, F. H. Moss, and I. Wladawsky-Berger

System/370 capability in a desktop computer 245
F. T. Kozuh, D. L. Livingston, and T. C. Spillman

A tight coupling of workstations 255
D. M. Chess

Architecture implications in the design of microprocessors 264
R. E. Matick and D. T. Ling

Use of images in commercial and office systems 281
P. J. Somerville

Security considerations for personal computers 297
W. H. Murray

Number Four

An overview of computer security 309
R. C. Summers

The design of the REXX language 326
M. F. Cowlishaw

An application analyzer 336
R. Ambrosetti, T. A. Ciriani, and R. Pennacchi

Performance issues in local-area networks 351
W. Bux

VM/370, Attached Processor, and multiprocessor performance study 375
W. H. Tetzlaff and W. M. Buco
